

Luftwaffe Combined Pilot/ Observer Badge 1936 - 45 (Gemeinsames Flugzeugfuhrer und Beobachter Abzeichen)

C.E.JUNCKER Aluminum Version

Description

This lightweight version of the Juncker 1st pattern (J1) P/O Badge was produced on the same dies as its Buntmetal brother, so the die characteristics should be identical. The Aluminum Doppel Abzeichen has unique rivets; they are flat topped, then taper outward to a protruding lip, which acts as a kind of 'washer'. Both barrel hinge and 'C' catch are attached directly to the wreath. The Juncker makermark is the only known-accepted type for all Juncker badges 1936 – 1944.

Prepared by Mark Miller VIII - 2 - 2005
